

Creativity

hi everyone ,first of all I will talk about myself , my name is bader bamuflih, I am from saudia arabia ,iam an international student , I have studied english in miami at barry university for 3 months , I .am gonna talk about creativity

Creativity noun : the ability to make new things or think of new ideas
creativity is a combinational force : it is our ability to tap into our inner pool of resources knowledge , in sight , information , inspiration and all the fragments population our minds that we have accumulated over the years just by being present and alive and awake to the .world and to combine them in extraordinary new ways

Is this possible in business? I believe so , but you have to be willing to fake risks and .progress through discomfort to get to the finish line

.Creativity is the most crucial factor for future success

today , I will talk about my experience. when I was 18 I studied at school. also ,I was player soccer with many football clubs .also , I memorized a lot of pages for holy quraan. It is the holy book for muslims . As well , I recorded different videos in tik tok . The different .in thease videos is I can be a good actor .also , I can change any thing in thease videos

. Ok, students maybe will think about where is the creativity in thease things

I will explain to you guys . If you focus for your talent and work for it ,you will be a talent , . but if you have ability to study and focus for your religion and work for your talent

. some people have many talents

for experience reason , now I study english at els. After that, I will study airplane maintenance engineering . Also , I play soccer in miami two times every weekend . The point here there are many people asked me about I play with them team and I will play in a cub this saturday. The prize maybe 3000 dollars. Also I memorized for holy quraan more .than 200 pages. Another thing, I have around 23000 viewers for my videos . I mean tik tok

Lastly , if you have a talent or more than talent work for it but do not leave your study work harder for your study because this is your future . Also , be good with your god then you .will be a creator

In my opinion , a study by george land reveals that we are naturally creative and as we grow up we learn to be uncreative. Creativity is a skill that can be developed and a .process that can be managed
